## Prospectus.

---

St. Ignatius College was erected in 1869, under the auspices of the Society of Jesus, for the higher education of the Catholic youth of Chicago and vicinity. A charter was granted to the Institution by the Legislature of the State of Illinois, June 30th, 1870, with power to confer the usual degrees in the various faculties of a University.

The College is intended for Day Scholars only.

The Scholastic Year consists of one session, beginning on the first Monday of September and closing on the last Wednesday of June; at which time, after due examination of the classes, the Annual Commencement Exercises take place.

When a pupil presents himself for admission, he is examined by the Prefect of Studies, and placed in the class for which his previous attainments have qualified him. If he comes from another Institution, he is required to bring satisfactory testimonials.

Students may be promoted during the session, when, by successful efforts, they have fitted themselves for a higher class, and such promotion is held to be equivalent to the honors of the previous class.

Once every month, in the presence of the Faculty and students, badges of distinction for proficiency are bestowed upon the most deserving.

About the same time, *Bulletins*, or *Monthly Reports*, are made out, giving an exact account of the Deportment, Diligence and Proficiency of each student. Parents and guardians should see that these reports be delivered to them by their sons or wards.

The Catholic students are carefully instructed in the doctrines and practices of their holy religion, and the most solicitous attention is paid to the morals of all. Whilst within the College premises, the pupils are constantly under the watchful care of one or more of the Prefects or Professors.

Though the government of the Institution is rather mild than severe, yet, for the maintaining of order and discipline, without which good results are not attainable, strict obedience, assiduous application and blameless conduct are required of every student. Any serious neglect of these essential points renders the offender liable to effective correction and even to dismissal.

As the progress of the students greatly depends on their regular attendance at school, they should never be kept from their respective classes, except for grave reasons; and their private studies, to which two or three hours ought to be devoted daily at home, should be watched over by parents or guardians with great solicitude.\* In case of absence, a satisfactory note from the parents or guardians is invariably required. Too frequent absence, except in case of sickness, is sufficient cause for dismissal.

Due notice should be given when a student is to be withdrawn from the Institution.

---

## Terms.

TUITION, per Session of Ten Months, . . . . . \$40.

The Session is divided into Quarters, beginning, respectively, about the 1st of September, the 15th of November, the 1st of February and the 15th of April. In all cases payments must be made semi-annually, or quarterly, in advance. No deduction is allowed for absence, except in case of dismissal or protracted illness.

Students of Physics and Chemistry pay \$10 per session for the use of Apparatus, Chemicals, etc.

Graduates of the Institution pay a fee of \$5 on the reception of their diplomas.

---

\* Special attention is called to this point; and parents are requested to co-operate with the exertions of the Professor, not only by showing that they appreciate the efforts of their children, but also by encouraging them with rewards.

## Courses of Study.

---

There are three Courses of Study, the Classical, the Scientific and the Commercial.

---

### THE CLASSICAL COURSE.

The Classical Course is designed especially to qualify young men for the study of the learned professions. Besides a thorough acquaintance with the Classics and Mental and Moral Philosophy, it aims at imparting a general knowledge of the Sciences. At the successful completion of this course the student receives the Degree of Bachelor of Arts; and after one additional year devoted to the study of Ethics, or two years spent at Law or Medicine, the Degree of Master of Arts is conferred.

This course comprises two departments, the Grammar Department and the Collegiate Department.

## The Chrysostomian Society.

The Chrysostomian Society was organized on the 10th of November, 1875. Its object is to promote the cultivation of eloquence, the acquisition of sound knowledge and a taste for literary studies. The exercises, at the weekly meetings, consist chiefly of original essays and the discussion of subjects approved by the President. A select library of 600 volumes is at the service of the members. None but students of the more advanced classes are eligible to membership. The President is appointed by the Faculty; the other officers are elected by the members.

## APPENDIX.

---

Our Museum received, this past year, several valuable additions.

The Mineralogical and Geological collections were enriched by many specimens of new species from California, Arkansas, Missouri, Iowa, Michigan, New Jersey, New York, Ohio, Kentucky, and from Nova Scotia. From our own State a number of limestone petrifications, and in particular beautiful petrified ferns from Morris, were obtained; also a rare specimen of Fulgorite.

As soon as time permits, we intend to prepare a detailed catalogue of all the specimens in these departments.

Among several acquisitions in the line of Ornithology, we may single out the *Paradisea Superba*.

We express our thanks to Mr. J. WALLACE, of New York City, for a genuine *Rana Cornuta*, Horned Frog, from Surinam. Also to Mrs. M. NOTEWARE, of Cedar Hill, Neb., for two pieces of old Roman silver coin, now quite rare.

Indian curiosities were also added, such as arrow heads of flint, hatchets of the same material, one made of Limonite, and another, of the largest size known, of fine, grained granite.

We now continue the catalogue of our shells, as far as determined :

*Solarium perspectivum*, Linn., Ind. Ocean.
